## PROFESSIONAL SUMMARY

Full-Stack Software Developer with hands-on experience designing and building web applications from scratch across healthcare, e-commerce, business management and booking systems. Experienced in frontend and backend development, database integration, authentication, access control, API integrations and application workflows. Comfortable independently handling technical implementation, troubleshooting and delivery. Uses AI-assisted development tools as part of a daily engineering workflow.

## TECHNICAL SKILLS

**Frontend:** JavaScript (ES6+), React, Next.js, TypeScript, HTML, CSS, Tailwind CSS

**Backend:** Node.js, Next.js API routes, PHP, Laravel, Python

**Databases:** PostgreSQL, Supabase, MySQL, MongoDB

**Integrations:** REST APIs, Paystack, Maps APIs, Webhooks, Cloudflare R2

**Tools:** Git, GitHub, Postman, Vercel, VS Code

**Practices:** Authentication, role-based access control, multi-tenant architecture, PWA functionality, IndexedDB, responsive design, debugging, AI-assisted development

## PROFESSIONAL EXPERIENCE

### Freelance Full-Stack Developer – Mini Dubai Boutique

August 2026

- Built an e-commerce application from scratch, including the customer storefront and administrative dashboard.
- Implemented product management, bulk image uploads and New Arrivals functionality.
- Developed a shopping cart with WhatsApp-based ordering.
- Integrated Supabase for application data and Cloudflare R2 for image storage.
- Implemented image conversion and AI-powered image-to-text functionality.

***Stack:*** *Next.js, React, JavaScript, Supabase, Cloudflare R2, Tailwind CSS*

### Independent Full-Stack Developer & IT Technical Consultant – Revisit HMS

January 2026 – May 2026

*Client engagement: Enoma Medical Center*

- Independently developed a hospital management system covering patient records, appointments, admissions, billing, pharmacy, inventory and laboratory workflows.
- Implemented application functionality using Next.js, Supabase and PostgreSQL.
- Worked on authentication, role-based access control and hospital-specific data handling.
- Developed PWA and offline capabilities using service workers, IndexedDB and a queued synchronisation mechanism for selected operations.
- Loaded and tested more than 1,000 patient records, particularly to assess billing workflows.
- Provided technical support and trained more than 30 hospital staff.
- Diagnosed and resolved software, hardware and network configuration issues, including restoring browser functionality on legacy computer hardware.

***Stack:*** *Next.js, React, JavaScript, Supabase, PostgreSQL, Tailwind CSS, IndexedDB*

### UI/UX Designer – Ajanjula-27

October 2025 – November 2025

- Designed and developed landing pages for a political re-election campaign.
- Worked under client feedback and delivery deadlines.
- Contributed to interface design, responsive layouts and frontend implementation.

***Stack:*** *Figma, React, Next.js, Tailwind CSS*

### Freelance Full-Stack Developer – Shipping & Logistics Client

August 2025 – January 2026

- Built and deployed a website for a shipping and logistics business.
- Integrated Maps API functionality to display shipping routes and service areas.

- Developed responsive product listings backed by Supabase and PostgreSQL.
- Implemented customer inquiry and contact workflows alongside email automation.

***Stack:*** *React, Next.js, Tailwind CSS, Maps API, Supabase, PostgreSQL*

**Full-Stack Developer – Hopes Bridge** 2025

*Remote Client Project*

- Developed and delivered a website used by the organisation.
- Built campaign and blog sections to support organisational content and fundraising.
- Implemented an online donation workflow using Paystack.
- Developed campaign management functionality and responsive interfaces.

***Stack:*** *React, Next.js, TypeScript, MongoDB, Tailwind CSS, Paystack*

**Full-Stack Developer Intern – SyntechHub**
