PROFESSIONAL SUMMARY

Full stack developer who has shipped multiple production-grade systems and taken complex products from initial concept to deployment. Optimizes productivity and software delivery speeds using advanced AI-assisted development workflows. Focuses on identifying real-world business gaps, engineering tailored technical solutions, and shipping high-performance applications.

EXPERIENCE

Lead Full stack Engineer & IT Specialist

Revisit Tech, Enoma Medical Center. Jan-May 2026

Cloud-based and offline hospital management system built specifically for Nigerian private hospitals and clinics. As IT Specialist, trained 30+ hospital staff on system usage, monitored software adoption across departments to identify and resolve gaps, diagnosed and resolved hardware and technical failures to minimize clinical downtime, and managed a continuous backlog of technical requests and improvements

Roles, Contributions, Achievements:

- Designed slug-based multi-tenant architecture, fully isolating each hospital data on Supabase instance
- Administrated Groq AI to convert doctor voice inputs to structured consultation notes, cutting manual documentation time
- Enforced role-based access control (RBAC) at the PostgreSQL database level via Row Level Security policies, and UI gatekeeping, preventing unauthorized data access across staffs.

- Built an offline-first PWA with service worker, Indexed DB sync queue, eliminating downtime for clinics in connectivity environments
- Built full patient registration and membership card system for patient intake and card system for families, helped tracked active, expiring subscriptions, on hospitals database.
- Administrated clinical records & inventory, for data storage and real time stocks tracking
- Built drug trend tracking to surface prescribing patterns across the hospital, helping staff spot unusual or high-frequency drug usage
- Implemented repeat prescription tracking, flagging drugs which has being prescribed before, visits, to help deliver accurate and best medical care
- Implemented HMO/NHIA billing, pharmacy, ward & bed management module
- Extended EMR software with a connected Labs module, covering requests, submissions, file uploads, and automatic abnormal-value detection.

Stack: Next.js · Next.js API · Supabase · PostgreSQL · Groq AI · Tailwind CSS · Vercel

Skills: Leadership · Technical & Critical Thinking · Problem Solving · Communication

Freelance Full-Stack Developer

Mini Dubai Boutique. August 2026

Built and deployed a clothing e-commerce site, admin panel with full product CRUD, automated bulk image upload, and New Arrivals management.

Roles, Contributions, Achievements:

- Administrated convert to jpeg and webp bulk upload, which helped manage storage as large files uploads will be converted to little sizes
- Integrated Groq AI engine, for image to text features for easy no stress image content uploads, helped saved time and money as dozens of product content where auto generated
- Created creative designs, made UI designs and layout decisions that increased easy user experience, and faster browsing
- Set up Supabase for structured product/order data and Cloudflare R2 for image storage, keeping the stack on free-tier infrastructure

Stack: Next.js · Next.js API · Supabase · Tailwind CSS · Vercel

UI/UX Designer

at Ajanjula-27, Oct-Nov 2025

Worked under tight deadlines and close client oversight, conducted A/B tests, designed, and converted landing pages for a political re-election campaign.

Stack: React · Next.js · Tailwind CSS · Figma · CMS

Freelance Full-Stack Developer

August 2025 – January 2026

Built and deployed a website for a shipping/logistics company with Live real time, Map Navigation, product listings, and email automations & contact flows.

Roles, Contributions, Achievements:

- Integrated Maps API to display shipping routes/service areas, giving customers real-time location context for deliveries
- Built a responsive product listing system with structured data in Supabase/PostgreSQL, making it easy for the company to manage and update their catalog
- Built a contact/inquiry flow connecting customer requests directly to the business, replacing manual handling with a structured pipeline

Stack: React · Next.js · Tailwind CSS · Maps API · Supabase · PostgreSQL

Full stack Developer

2025 Remote

Built a complete MERN stack site for a charity organization, profile campaigns, log stories and donation section, mobile-optimized.

Roles, Contributions, Achievements:

- Built a donation flow enabling the organization to accept and track contributions online, Pay stack.
- Built a campaigns section allowing the organization to publish and manage fundraising initiatives independently, without developer involvement
- Delivered a fully mobile-optimized site using the MERN stack, ensuring accessibility for donors across devices

Stack: React · Next.js · Tailwind CSS · TypeScript · MongoDB · Next.js API · CMS

Full stack Developer Intern

SyntechHub (Remote — India) October 2025

Completed frontend development in a structured team environment, delivering deadlines in a collaborative workflow.

Stack: Next.js · React

TECHNICAL SKILLS

Frontend: Next.js (App Router, CSR, SSR), JavaScript ES6, Tailwind CSS, HTML, CSS, React

Backend: Node.js, Next.js API, Supabase, PostgreSQL, mySQL, MongoDB, Php/Laravel, Go, Python (basics)

Tools: Vercel, GitHub, Postman, VS Code, Claude, LLM Integration

Practices: AI-assisted development for faster delivery, Multi-tenant architecture, RBAC, Offline development, Responsive design, Critical thinking, Deep Research, Problem solving, Lazy loading.

SOFT SKILLS

Critical thinking · Research · Problem solving

SELECTED PROJECTS

Spa & Beauty Booking Platform

End-to-end booking and client retention system for beauty and wellness businesses.

- Automated WhatsApp follow-ups for lapsed clients; webhook-triggered owner notifications on payment confirmation
- Pay stack integration with slot locking and online booking

Revisit Lab

Connected to revisit HMS, carries full lab workflows. Results requests, submission, file uploads, Smart abnormal values Tracking & auto detect etc.

CERTIFICATION

Certified Full Stack Developer from Code Academy 2025.
